Open to global relocation and require visa sponsorship.

PROFESSIONAL SUMMARY

Accomplished Senior Full Stack Engineer with 7 years of experience in designing and delivering enterprise-scale applications using Java, Spring Boot, Angular, and Monolithic & Microservices. Expert in backend architecture, REST API design, and cloud integrations (Azure/AWS), with a proven track record of leading end-to-end software delivery for global platforms supporting millions of users. Recognized for driving innovation through AI-driven solutions and technical leadership in globally distributed teams.

TECHNICAL SKILLS

Languages & Frameworks: Java 21, Spring Boot, Python, JavaScript, TypeScript, Angular (8-21), HTML5, CSS3, Hibernate, JPA.

Cloud & Infrastructure: Microsoft Azure (Service Bus, Key Vault), AWS (S3, CloudFront), Microservices Architecture, RESTful APIs, JWT, OAuth 2.0.

Databases & Caching: Microsoft SQL Server, MySQL, Apache Ignite (Distributed Caching), Flyway, Liquibase.

DevOps & Testing: Git, Maven, Jenkins, Azure DevOps, JUnit, Mockito, JMeter, JaCoCo, Postman, Swagger.

PROFESSIONAL EXPERIENCE

Senior Software Engineer | NielsenIQ

September 2023 – Present | India (Remote)

Project: WaySeeker

- Spearheaded the end-to-end development of WaySeeker, an enterprise platform that replaced a commercial solution, saving the firm millions of dollars in annual licensing costs.
- Architected and implemented core modules using Java (17 - 21), Spring Boot, and Angular (16 - 21), supporting millions of internal users across 50+ countries.
- Designed 100+ high-performance RESTful APIs and delivered five major business modules, ensuring secure and reliable communication across enterprise applications.

- Integrated Azure Service Bus and Key Vault to implement secure event-driven communication and centralized secrets management.
- Led a team of 3 engineers, overseeing task assignment, code reviews, and technical mentorship to ensure high code quality and timely delivery.
- Strengthened application security by implementing Spring Security and JWT-based protocols, ensuring zero unauthorized access incidents across the platform.

PROJECTS & INNOVATION

AI Multilingual Translation Solution (NielsenIQ Hackathon Runner-Up):

- Developed a Python-based PoC evaluating Large Language Models (LLMs) using BLEU and BERT metrics to determine optimal translation performance for enterprise use.
- Secured 2nd place globally by demonstrating the feasibility of integrating generative AI translation capabilities into existing enterprise workflows.

Software Engineer | Majorel India

July 2021 – September 2023

Project: Enliven CEM (Customer Experience Management Platform)

- Developed a centralized logging framework using AOP, standardizing logs across the CEM platform and significantly improving system maintainability.
- Optimized application performance by implementing Apache Ignite as a distributed caching solution, reducing database load and enhancing scalability.
- Integrated AWS S3 and CloudFront (CDN) for secure document storage, achieving high-speed content delivery and a 30% reduction in media latency.

Programmer Analyst | Cognizant Technology Solutions

July 2019 – July 2021 | India

Project: ET Manager (Enterprise Task Management Platform for Walmart)

- Orchestrated the migration of a legacy monolithic platform to a modern Microservices architecture using Spring Cloud (Eureka, Ribbon, OpenFeign).
- Developed secure backend APIs for Walmart's task management, ensuring robust authentication via JWT and OAuth to support thousands of daily concurrent users.

Education

Bachelor of Technology (B.Tech.) in Computer Science and Engineering
Lovely Professional University, India | CGPA: 8.60 / 10.00 | Graduated: July 2019
